High Pressure Boiler Operator Licensing Program

A Fully Approved Program Designed to Prepare Participants for the State of Ohio Boiler Operator Licensing Examination... **IN ONLY TWELVE DAYS!**

This accelerated program is well known for its success in preparing personnel like yours for the challenging State of Ohio exams. Many Hands-On exercises and creative activities enhance retention as we:

- Operate and troubleshoot typical flame safeguard control systems for boiler burners
- Learn to make and interpret standard boiler water chemistry tests
- Analyze many “cutaway” boiler and steam system components
- Learn the purpose and principles of all major components on typical industrial, commercial, and utility boiler installations
- Trace piping circuits for pressure reducing valves, steam traps, deaerators, flue gas cleaning equipment, fuel delivery systems, and much more
- Visit operating facilities to see a wide variety of steam plant equipment and processes

About the Instructor –

R. Dean Wilson has extensive firsthand experience in boiler and steam system operation and maintenance. His industry experience includes commissioning, startup, and operation of a 90-megawatt electric power generating plant and a \$35 million waste heat recovery boiler plant, as well as project engineering, safety, and sales experience. He is a licensed First Class Stationary Steam Engineer, State of Ohio.

As a professional trainer and training consultant, he has conducted operator licensing courses, customized in-plant training programs, and seminars for over 20 years. He is an expert in the sciences and techniques involved in adult training. Dean is the author of “Boiler Operator’s Workbook”, published by American Technical Publishers.

Stationary Steam Engineer Licensing Program

A Fully Approved Program Designed to Prepare Participants for the State of Ohio Stationary Steam Engineer Licensing Examination... **IN ONLY FOUR DAYS!**

This Program Supplements the High Pressure Boiler Operator Program. In it, we will:

- Provide the participant with the knowledge needed to begin to function as a Stationary Steam Engineer. Topics include fundamentals of steam turbine operation, industry-accepted techniques and procedures, system safety, auxiliary equipment operation, power generation, equipment maintenance, and more.
- Prepare the participants to sit for the State of Ohio Stationary Steam Engineer licensing examination
